Enter a region or area of interest into the

 Enter a region of interest

search box on the top left-hand corner of the screen

Option

3

Click anywhere on the interactive map to zoom in on it

For more information about statistical areas refer to [Technical information](#).

Search results for a specific indicator

Results can be filtered by

1. Age and sex.
2. Collection year.
3. Statistical area.

Select age and sex

Click on  to see available age groups and sex breakdown. Select the option(s) of interest. Please note that not all data has the same options available.

Hide the menu by clicking on  For more information about age and sex selections, refer to [Technical information](#).

Select collection year

Click on  to see available data collection years from 2006-2022. Select the year of interest.

Hide the menu by clicking on 

For more information about collection years refer to [Metadata](#).

Select statistical area (also called geographic area)

Click on  to see available statistical/geographical areas. Select the area of interest.

Hide the menu by clicking on 

For more information about statistical areas [click here](#).

Turn on/off service layers

There is an option to display various services available for children and young people in the selected area.

Click on  to turn on the service layer(s) of interest.

Choose from one of five service layers by clicking on the name in the menu (see below).

Healthcare Services

General Practice

Hospital Services

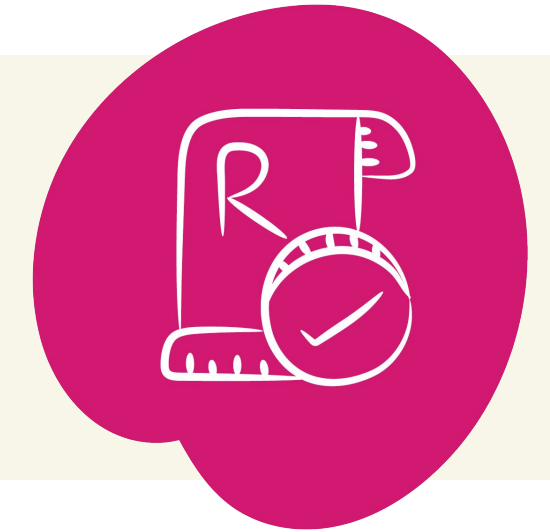

Childcare Centers

Schools

Different services are symbolised through a dot on the map. Hover over the dot to see the name of the service.

Results

Results are displayed in the results panel on the right-hand side of the screen.

National scale result

The result for the location of interest will be displayed as a black dot on the national scale, as well as in numerical value (either as a whole number or a percentage) on the right.

For data available for selected states only, the national scale will show as the state/territory scale.

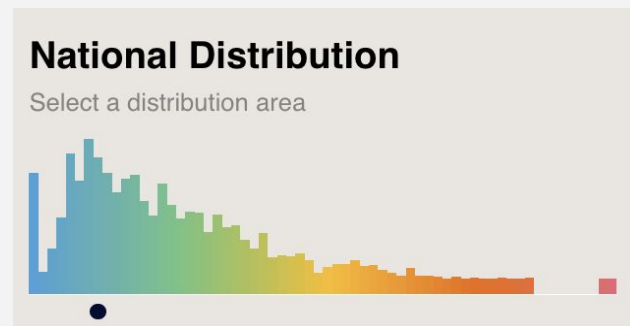

Click on  to view an explanation of the national scale.

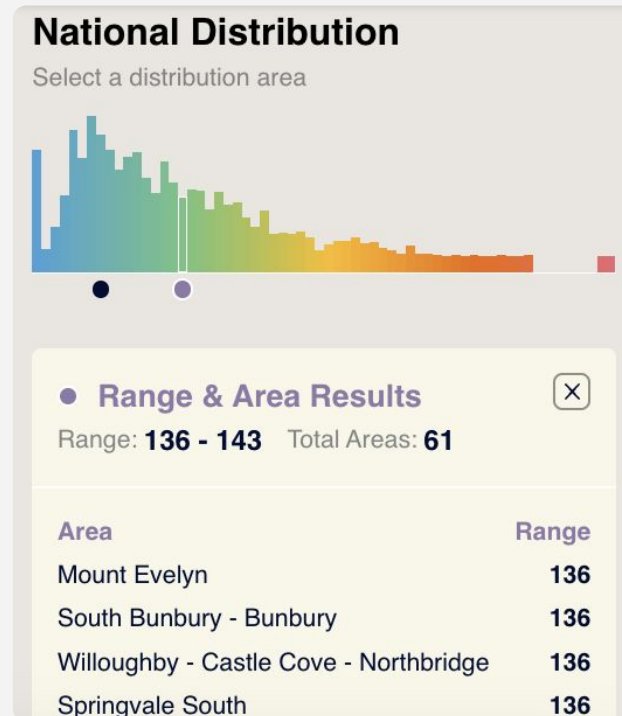

National distribution

All results for the specific indicator will display on a national distribution chart. The result for the chosen area is visualised beneath the chart by a black dot.

By clicking anywhere on the same chart, it will display the results for the same indicator in other statistical/geographical areas

Statistical areas and related themes

Go to the coloured squares 

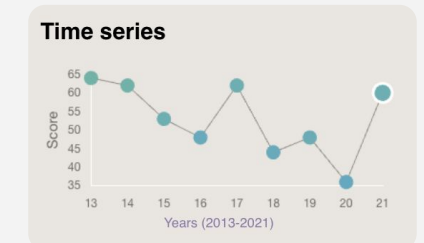

Click on  next to the coloured squares to explore related themes in different statistical areas.

For more information about how results were calculated and for metadata information refer to [Technical information](#).

Time series

Results for all collection years available are indicated on the time series chart. Clicking on any of the time dots will show results for the specific year or time period.

For more information about how results were calculated and for metadata information refer [Metadata](#).

Data source

Click on  in the left bottom corner next to the selected indicator to see the data source including the name of data provider and the year of data collection.

Compiled by UWA and QUT based on Australian Bureau of Statistics, Births, Australia, 2021.

For more information about the data source and notes on the data refer to [Technical information](#).
